SINTEF

CustusX Non-Exclusive License Agreement

1 Description of the software

CustusX is a software for research in image-guided surgery. CustusX consists of all source code that can be found on git@github.com:SINTEFMedisinskTeknologi/Custus X3.git and executable applications compiled based on this source code (hereafter referred to as applications).

2 Copyright

Stiftelsen SINTEF acting through its Institute of Technology and Society, Department of Medical Technology (hereafter referred to as SMT) has the copyright to CustusX.

3 Conditions of Use

i. This agreement provides a non-exclusive license to the software described in section 1. Duration, possible payment and similar, are specified under "Special Conditions".

ii. SMT acquires copyright to modifications or additions that are added to the source code.

iii. Work/research performed by CustusX shall be credited CustusX and SMT in writing.

iv. This non-exclusive user right is given without warranty and without adjustment for any particular purpose. SMT takes no responsibility for clinical use.

v. All the information the licensee acquires through use of CustusX shall be kept confidential unless the information is publicly available, was known by licensee on receipt, or was received from a third party without confidentiality obligation.

vi. When the right to use CustusX ceases, all software included under this non-exclusive license shall be erased.

vii. All relevant software developed in connection with this non-exclusive licence agreement shall be included into CustusX.
